OVERVIEW

The Inter-Alpine Natural Hazards Conference (INAC) has the overarching goal of merging the knowledge of key actors, decision makers and operators in industry, infrastructure, engineering and research.

In conjunction with the world leading international trade fair INTERALPIN the INAC adds an additional value for sustainable protection approaches in natural hazards and risk management.

Focal points of the conference are technical protection measures, nature-based solutions and innovative safety concepts for mitigating risks of natural hazard processes, such as snow avalanches, debris flows, floods, rockfall or storms in a rapidly adapting alpine environment and changing climate conditions.

TARGET GROUPS

- Science and research
- Application industries, manufacturers and producers dealing with measures to detect and prevent natural hazards
- Relevant authorities, entities, institutions and organizations
- Municipalities and federal states
- Infrastructure companies in the road, rail and mountain railroad sectors
- Engineering and planning offices
- etc

INTERALPIN

INTERALPIN is the leading international trade fair for alpine technologies and a central meeting point for the industry. It brings together innovative solutions and the latest developments in the fields of ropeway technology, snow management, slope grooming, access control, safety, the leisure industry and much more. Experts from all over the world use INTERALPIN, which will take place from Tuesday, 6 May to Friday, 9 May 2025, to exchange ideas, network and discover pioneering technologies that are revolutionizing Alpine tourism and urban transportation.

FACTS & FIGURES

- The leading international trade fair for alpine technologies since 1974
- INTERALPIN 2023 attracted more than 35.000 trade visitors from about 130 countries
- Approximately 75% of visitors are involved in making decisions
- INTERALPIN 2025 will be a fourday event (May 6th – 9th)
- Inspiration Days on May 7th
